Pre-Quotation Disclosures

The Company successfully completed its initial public offer of shares and options, raising approximately \$314 million. The Company is extremely happy with the results of the Offer.

The Company offers its Shareholders access to a long-short global securities investment portfolio with a currency overlay. The Company's Portfolio will be constructed in accordance to the Manager's investment approach which aspires to grow wealth over the long-term by generating positive returns in excess of the Benchmark at below market levels of risk.

The Manager seeks to purchase securities in what it considers to be great businesses that are not valued as such, and build a high conviction Portfolio with a capital preservation focus.

Andrew Findlay has temporarily stepped down from the Company's board of directors as we have been unable to obtain in sufficient time the required good character documentation that is required to be provided to the ASX. Andrew will re-join the Board once this documentation has been obtained and provided to the ASX.
